

International meeting

Canine genomics and veterinary: from domestication to pathologies

Department of Veterinary Medicine, University of Milan

18th June 2018 - 08:30/13:30

Milan - Via Mangiagalli 25, Room C03 (Floor -1)

Genomics and veterinary: face to face talks.

How does modern dog breeds evolved? Which path have they shared with man? What does my dog look like? What has changed in dog's heart disease in recent decades? What do we know about tumors in dogs? Is there a relationship with humans?

An international meeting to present some of the most innovative researches for an integrated approach between genomics and veterinary medicine, in the interest of the man's best friend.

Speakers:

Elaine A. Ostrander - National Institutes of Health, U.S.A.

Claudio Bussadori - Clinica Veterinaria Gran Sasso, Milan

Dayna Dreger - Purdue University, U.S.A.

Stefano Comazzi - University of Milan

Luca Aresu - University of Turin

Valeria Grieco - University of Milan

Andrea Talenti - University of Milan

Chair:

Paola Crepaldi and **Stefano Frattini** - University of Milan
