

Antech is excited to announce 2 positions for Assistant Directors in Anatomic Pathology. The Assistant Directors will be an employee-oriented leadership role, with approximately half of the Antech anatomic pathology team reporting to the position. The primary focus will be the professional development of their direct reports. The position can be remote, and will have a 75% / 25% effort for case sign-out / administration.

Antech is a division of Mars Veterinary Health, a privately held corporation focused on making the world of better place for pets. Our ecosystem includes clinical divisions-- Banfield, BluePearl, and VCA—and is the largest corporate veterinary organization in North America. Antech's position within this unique, inclusive environment allows for singular opportunities to contribute to the future of veterinary pathology and animal health.

Antech's biopsy base is large and diverse, representing wide diversity of species from across North America, the Caribbean, and Asia. Our digital pathology platform allows you flexibility in your workday, and easy collaboration with colleagues. Opportunities to specialize in canine and feline cancer, liver disease, dermatopathology, ocular pathology, oral pathology, exotics, and fam animals are available. Veterinary student teaching opportunities are also available through our partnership with Western University.

At Mars, we believe that the world we want tomorrow starts with how we do business today. If you feel the same way, view the complete job description and apply at our website. The deadline is Jan. 17th, 2022.
