

Clinical Track Faculty Position in Veterinary Clinical Pathology

The Department of Veterinary Biosciences (VBS), College of Veterinary Medicine (CVM) at The Ohio State University (OSU), is seeking outstanding candidates for a full-time clinical track faculty position at the rank of Assistant, Associate, or Professor-Clinical. The position is predominantly clinical service and teaching with an opportunity for collaborative research. The distribution of effort is negotiable and depends on the interests of the candidate.

Responsibilities:

1. Diagnostic service (approximately 45%): Clinical service responsibilities include interpretation of in-house cytology, digital cytology, hematology, coagulation, endocrinology, clinical chemistry, urinalysis, point-of-care tests, and flow cytometry; consultations with clinicians regarding laboratory results or sample submissions; support to the clinical pathology technical staff; new test development; and maintenance of quality assurance. These services will be divided amongst a team of 3 clinical pathologists.
2. Teaching (approximately 25%): The faculty member will participate in clinical training of veterinary students in Clinical Pathology and pathology residents in the Combined Clinical Pathology Residency/PhD Graduate Training Program. Didactic teaching responsibilities will include participation in the professional veterinary medical curriculum and in the courses provided to pathology residents in the Combined Pathology/PhD Program.
3. Research and scholarly activity (approximately 30%): The faculty member will contribute to collaborative research and scholarly activities synergistic with the College's research, teaching, and clinical service missions.

Qualifications: Applicants must have a DVM (or equivalent) from an AVMA-accredited or equivalent institution and be board certified in clinical pathology by the American College of Veterinary Pathologists or the European College of Veterinary Pathologists or take the board exam within 12 months after starting the position. An overarching component of this position is training and mentoring students in a combined residency/PhD program, and so a PhD or a strong record of advanced research experience is desirable. The successful applicant must possess exceptional interpersonal and communication skills, prioritize collegiality, and demonstrate effectiveness in teamwork.

The Department comprises 25 faculty, including 9 Diplomates of the American College of Veterinary Pathologists (6 certified in anatomic pathology and 3 certified in clinical pathology), and combines the disciplines of oncology, immunology, virology, microbiology, physiology, and anatomy. The College is a member of the most comprehensive Health Sciences Center in America, which includes on a single campus the Colleges of Veterinary Medicine, Medicine, Pharmacy, Public Health, Dentistry, Optometry, Nursing, and Allied Health Sciences.

Columbus, Ohio's capital and largest city, offers a convenient lifestyle with affordable housing and easy commutes. Residents enjoy the many amenities of the city including professional sports teams, museums, outstanding restaurants, performing arts, parks, as well as unique boroughs and neighborhoods.

Applications should be submitted through

https://osu.wd1.myworkdayjobs.com/OSUCareers/job/Columbus-Campus/Clinical-Track-Faculty---Veterinary-Clinical-Pathology_R61492-1 and include curriculum vitae, cover letter, a document describing the candidate's teaching (veterinary and graduate students, residents) and research philosophy, a diversity statement and the names (with complete contact information) of at least three individuals from whom letters of reference may be solicited. Academic rank and salary are negotiable and commensurate with the

candidate's background and experience. Please contact the Chair of the Search Committee, Dr. Stefan Niewiesk (niewiesk.1@osu.edu; phone 614 688 3605), Department of Veterinary Biosciences, The Ohio State University, 1925 Coffey Road, Columbus, OH 43210, with any questions. Review of applications will begin four weeks after the posting of the position announcement, and will continue until the ideal candidate has been selected.

The College of Veterinary Medicine and The Ohio State University are committed to establishing a culturally and intellectually diverse environment that supports the free exchange of ideas in a professional and collegial manner in all academic endeavors as we engage audiences and serve our communities from a wide spectrum of backgrounds and experiences. The Ohio State University is an EEO/AA Employer and fosters a tobacco-free environment. All qualified applicants will receive consideration for employment without regard to race, color, age, religion, sexual orientation or identity, national origin, disability, or veteran status.
